

"ding-dong"

The sound of a repairman arriving at your door or a friend dropping by—these are the kinds of things you don't want to miss. For Jerry, who lost his hearing in a car accident, the ringing of a doorbell went unanswered until Lucille became his ears... and faithful friend.

Lucille and Jerry

Since 1977, Dogs for the Deaf has rescued and professionally trained thousands of unwanted dogs, transforming them into heroes. These four-footed companions, provided at no cost to the hearing impaired, alert their owners to the world of sound around them.

A new life for Lucille—*independence and social interaction* for Jerry.
